

#1 All-in-One Enterprise Backup & Continuity Solution

Simpler, Better, Smarter IT

What We Do

Unitrends enterprise backup and continuity solutions reduce vendor complexity and increase IT confidence, enabling better productivity and business uptime. Available as an all-in-one physical or virtual appliance, Unitrends joins data protection, analytics, compliance reporting, ransomware detection, and DR automation for a single site, cloud, or unlimited remote sites.

Recovery Series Backup Appliances

Simplify backup and continuity with the industry's most awarded all-in-one solution. These physical hardware appliances are pre-loaded and pre-tuned with powerful, easy to use software that delivers on-premises backup with integrated long-term retention and disaster recovery in the Unitrends Cloud.

Unitrends Backup Software

Simplify local backup and offsite compliance requirements with an all-in-one software solution that delivers enterprise backup and continuity to your business. Powered by a super intuitive user interface, Unitrends Backup software is a full-featured virtual appliance that runs on the hypervisor or cloud of your choice. Integration with the Unitrends Cloud is built-in for long-term retention and disaster recovery.

Unitrends Cloud

Unitrends Forever Cloud delivers tiered long-term retention for offsite compliance. Unitrends DRaaS provides full failover into the Unitrends Cloud for DR with a 1-HR recovery SLA.

Cloud Backup for Office 365

Broaden your backup and recovery plan to include protection for Microsoft Office 365 emails, contacts, SharePoint sites, and OneDrive files. Easily and quickly recover lost emails and files in minutes with unlimited retention in the cloud.

Boomerang

Get simple, powerful Disaster Recovery for VMs, and an easy path to VM Migration. Easily replicate your VMs to low cost AWS S3 or Azure Blob storage, until needed. Deploy as VMs into AWS and Azure compute clouds for failover, DR testing, or permanent migration.

Your Data Is Undergoing Immense Changes

Digital transformation is altering organizations of all sizes and the pace of change is accelerating. This disruption is causing an exponential increase in the amount of data, number of workloads and complexity of technology IT must manage. IT is being asked to do more to more than ever, despite flat budgets and resources and increased risk such as ransomware.

Avoid Complexity & Do More with Unitrends

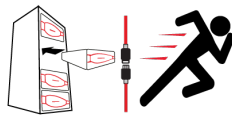

Unitrends increases uptime, productivity, and confidence in a world in which IT professionals must do more with less. Our all-in-one backup appliances simplify data protection, application spin-up, and SLA policy automation. Seamless integration with the cloud delivers long-term retention and fast disaster recovery.

No Finger Pointing

- One vendor means less management & no finger pointing to resolve issues
- Pre-tuned backup server, storage & software
- Unified protection anywhere – on-premises, cloud workloads, and Software as a Service (SaaS)
- All hardware, software, cloud and support from one vendor results in better customer satisfaction

Radically Simple to Deploy & Use

- Rack, connect, go in minutes
- Fewest clicks to set up & manage
- Automated protection with simple SLA policies
- Integrated Unitrends Cloud options for long term data retention and DRaaS make continuity easy
- Easily scale up & out from 2 TB – 3.6 PB

100% Confidence

- Analyze the impact of an outage before it happens
- Fully automated application-level testing & failover
- Automated backup and recovery testing
- Automated Disaster Recovery compliance reports
- Recovery Assurance for local, second site & cloud

Higher Security

- Purpose-built hardened Linux appliances
- 256-bit encryption of data in-flight and at-rest
- Ransomware detection via Predictive Analytics
- Instant Recovery for virtual & Windows workloads

Best-in-Class Satisfaction

- 98% customer satisfaction rating
- One support call for everything
- 24/7/365 availability
- Proactive monitoring & outreach
- Customer on-boarding & education
