

SPANNING BACKUP FOR OFFICE 365

The no-sweat recovery plan for Office 365

- Daily, automated and on-demand backup
- Advanced search
- Self-service recovery in seconds
- Lost data restored in just a few clicks
- Unlimited storage and retention
- Secure encryption
- Easy set-up—nothing to install

Your Microsoft Office 365 data isn't protected unless you back it up. Broaden your backup and recovery plan to include purpose-built protection for Office 365.

Exchange email, calendars, SharePoint Online, and OneDrive for Business are the applications your business relies on every day. But without a smart backup plan, lost data is gone forever or extremely time consuming to find and restore. Spanning Backup for Office 365 makes it easy to recover lost emails, files, folders, and more in seconds.

Office 365	How data loss can occur	Protect with Unitrends
Exchange Online 	So much of your business takes place over email, but users can permanently delete critical data, whether accidentally or intentionally. Exchange purges deleted data after 14 to 30 days.	With Spanning Backup for Office 365 you can recover lost email in seconds. Spanning also protects Exchange email, calendars, folders, and entire mailboxes and accounts, which can't be done with Office 365 alone. Unlimited retention means you don't have to worry about backup size.
SharePoint Online 	Teams use SharePoint to circulate important files and project information. But SharePoint files can become corrupted, taking hours to rebuild before being usable again. And, SharePoint site admins can permanently delete their SharePoint data, making it immediately unrecoverable.	Spanning Backup for Office 365 automatically backs up your data daily, with unlimited on-demand backups also available. This means you can quickly restore files, folders, and document libraries even if a user permanently deletes data. You can even rollback to a specific version of a file, folder or document library.
OneDrive for Business 	Many Office 365 users save all of their files to OneDrive for Business. But users can also permanently delete data in their OneDrive account, making it immediately unrecoverable.	Spanning Backup for Office 365 lets you go back and restore some or all of your OneDrive for Business data. Plus, unlimited retention means your data will be there when you need it.

Take advantage of Spanning's intuitive platform for recovery. Forget searching through a Microsoft archive. Instead, just browse and select to restore an email, file, folder, or entire account.

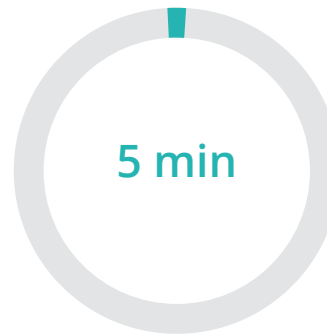

I'd been looking for an Office 365 backup solution since making the move to the cloud. I chose Unitrends because I have Unitrends protection on-premises. I know that both Genova and I are now fully protected across all our applications.

Spanning Backup for Office 365

Office 365 Archiving

Spanning Backup for Office 365 saves you time and stress with:

Protection for Office 365 Email, calendars, SharePoint Online, and OneDrive for Business: Extend your Unitrends backup to Office 365. No more panic when a user deletes an email or file.

Automated and on-demand backup: Your data is automatically backed up every day in the background and you can perform additional backups as needed at any time.

Easy setup: Nothing to install. Auto-discovery of mailboxes, SharePoint sites, and OneDrive for Business accounts makes backing up a snap.

Complete status monitoring: Monitor and resolve backup errors; plus enjoy complete confidence in your backups with a detailed status history.

Self-service recovery in seconds: No more painful searching. Just quick, self-service restore through an intuitive user interface.

Unlimited retention: No caps on data or storage. Priced simply per user per year.

Industry-leading security: Spanning has successfully completed the SSAE 16 SOC2 audit process, a rigorous evaluation of operational and security controls.

Cross-user restore from one Office 365 account to another: Enable administrators to quickly restore data from one user account into another.

Point-in-time backup and accurate, granular restore: Access historical snapshots or versions of all your data and restore to any previous version with 100% accuracy.
